Subject: Draft Erosion & Sediment Control Plan
12th Street Landfill Site
Wilmington, Delaware

Dear Mr. Towle:

Enclosed for your review is a set of Draft Erosion and Sediment (E&S) Control Plans for the referenced site.

The plans show a proposed layout for trailer, staging, and laydown areas, as well as site entrance, access/haul roads and stockpile areas.

The E&S Control Plan shown on these drawings essentially represents a "Phase I Plan" depicting those measures proposed to be employed so that the site construction of the above features could be initiated.

A Phase II Plan will be developed in the very near future to address the added E&S controls and measures necessary for work to begin on the Brandywine Creek shoreline bank cut-back, consolidation, capping and stream bank restoration.

Please contact me at (610) 701-7545 or Andrew Harpur at (610) 701-5293 with any comments you may have so that they may be incorporated into the drawings as part of the submittal to DNREC, scheduled for next week.

Very truly yours,

ROY F. WESTON, INC.
